EDUCATION

Indian Institute of Information Technology, Agartala
Bachelor of Technology in Computer Science and Engineering | CGPA: 8.24

Aug. 2023 – Present
Agartala, Tripura

EXPERIENCE

Research Intern - Blockchain and Solidity

May 2025 – Present

Indian Institute of Information Technology Allahabad

- Developing a smart contract-based student fund management system, enabling purpose-driven donations, student onboarding, and automatic NFT generation. Introduced features such as donor-defined intents, campaign mapping, vendor listing to ensure transparency and traceable fund usage.
- Testing smart contracts using Solidity, Hardhat, Remix and OpenZeppelin, with a focus on writing clean, secure, and gas-efficient code. Added important features like access control, event tracking, and secure fund transfer logic.
- Connecting smart contracts with a user-friendly Web3 frontend built in React and integrated using Ethers.js. Developed interactive dashboards for students, donors, and vendors to register, track live campaign activity, view donation history. Implemented smooth wallet connectivity, contract interaction, and real-time on-chain data updates for an intuitive dApp experience

PROJECTS

ECHO ECOMMERCE SITE | HTML, CSS, react, Javascript, node, express, mongoDB

- Echo eCommerce is a full-stack online shopping platform built and launched using MongoDB, Express.js, React, and Node.js. Integrated product search, cart management, and user profiles with REST APIs. Improved page performance by 40% using lazy loading
- Boosted page load speed by 40% via React lazy loading, image compression, and MongoDB indexing. Achieved 100 SEO score and optimized database queries to handle high traffic, improving page load times by 15%.
- Implemented JWT and bcrypt for user login/registration, reducing security vulnerabilities by 95%. Added role-based access control for admins and customers where admin can manage products, users, reviews

Chatter's Hub | HTML, CSS, react, Javascript, firebase

- Created a responsive chat application leveraging React.js and Chakra UI, ensuring 100% mobile and desktop compatibility, resulting user friendly experience across multiple devices with a Lighthouse performance score of 96+.
- Strengthened user experience by migrating to Firebase Authentication and Firestore, supporting 10,000+ concurrent users with minimal latency and zero downtime incidents.
- Implemented message handling, utilizing server-side time stamping to ensure messages are ordered correctly and displayed in real time, improving interaction speed and minimizing load time 40%.
- Improved application performance by reducing unnecessary renders and efficiently managing user sessions, resulting in a 30% improvement in app speed and responsiveness when interacting with Firebase services.

XBit Web Application | HTML, CSS, react, Javascript

- Deployed Xbit web application a cryptocurrency platform using React and Vercel, improving scalability and performance by 40%. Focused on responsive design, ensuring seamless access across 100% of devices.
- Upgraded website performance and accessibility, achieving a 98% accessibility score and improving SEO rankings by 50%. Used lazy loading and asset optimization, reducing load times by 30%.
- Enhanced data visualization with interactive charts, enabling users to analyze 24-hour and 30- day market trends with tooltip functionality.

TECHNICAL SKILLS

Web Development: Node js, Express, Redux, React, EJS, HTML, CSS

Programming Languages: C, C++, Python, JavaScript

Database: MySQL, Oracle Relative Database Management System, MongoDB

Developer Tools: VS Code, PyCharm, Git and Github, Sublime Text, Firebase, Postman API, MongoDB Atlas

ACHIEVEMENTS

- Solved 250+ Leetcode Problems, enhancing skills in dynamic programming, graphs, recursion and backtracking.
- Secured a top 5% rank in JEE Mains among 8,00,000+ students, showing fast learning and adaptability.
